

SE-12 SOLAR WATER HEATER CONTROLLER

FOB Shanghai Price: USD14.5/pcs

Solar water heating-microcomputer auto monitor

Major Technical Indications

Dimension: 180×125×45mm

Packing Box: 340×195×55mm

1.Power supply: 220VAC Power consumption: ≤4.5W

2.Accuracy of temperature measuring: ±2°C

3.Range of temperature measuring:0°C-99°C

4.Water level classification: Five classes display

5.Power of controlled water pump or electric heating wire ≤500W

6.Electromagnetic valve parameter: DC12V, pressurized or un-pressurized valve are available for selection

Operating pressure of pressurized valve: 0.02Mpa-0.8Mpa, suitable for supply water directly

Operating pressure of un-pressurized valve: 0.0Mpa suitable for water tank supply or low hydraulic-pressure supply.

Main Functions:

*Compulsive water loading

*Power on self-test

*Water temperature display

*Temperature-controlled loading

*Water level display

*Water shortage alarming

*Manual water loading

*Water full alarming

*Timing watering

*Constant level watering

*Auto watering Pressurization

*Power-off memory

*Delay insulation function manually

*water level bottom can be preset

*water level up-part can be preset
